Air conditioning, heating, ventilation and building services compliance experts

Your Macair prescription for healthy air conditioning

Dirty, inefficient systems often leak; they consume excessive amounts of energy, and they can allow airborne bugs to thrive.

Macair's health check provides a detailed diagnosis of all your systems, pinpointing particular issues so that expert technicians can service and sanitise your system to make them as reliable and efficient as they can be.

COMPLIANCE ALERT!

Air conditioners above 12kW output must have a current TM44 Energy Performance Certificate, in accordance with the Energy Performance of Buildings regulations, 2007.

CALL NOW TO ARRANGE YOUR FREE HEALTH CHECK: 020 3302 6887

How do you know if you are fully compliant?

Failure to properly maintain specific installations can result in a risk to life and non-compliance may result in personal or corporate prosecution.

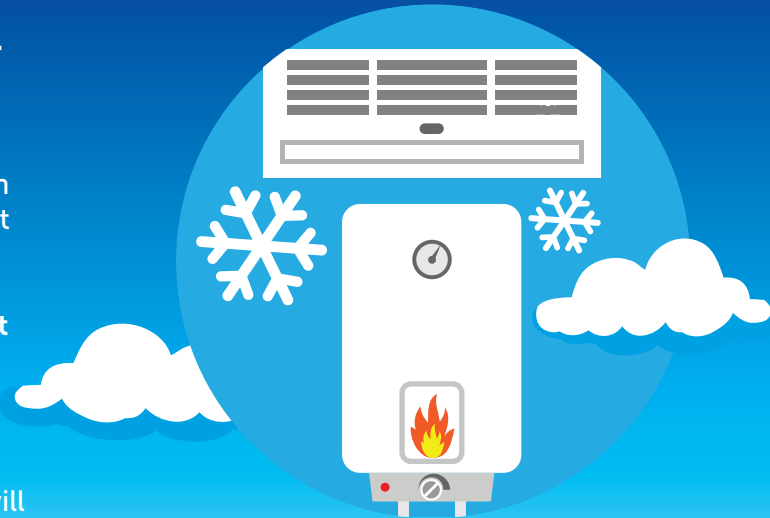

So how can you be sure that you are fully compliant in all areas?

Macair offers a **free compliance gap survey**. Experienced surveyors will visit your premises to let you know exactly what needs to be in place. They will also identify any shortcomings and advise on any action required, resulting in complete peace of mind.

COMPLIANCE ALERT!

Failure to properly maintain specific installations can result in a risk to life. Non-compliance may result in personal or corporate prosecution.

TO ORGANISE A FREE COMPLIANCE GAP SURVEY, CALL: 020 3302 6887

Warm office, cooler planet

With our own planet running a temperature, our responsibility for reducing the CO2 emissions from our heating and ventilation systems is moral as well as legal.

Macair's boiler and air-conditioning health check has three major benefits - to increase the efficiency of your building's system, to **reduce your company's carbon footprint** and to keep your company fully compliant with all relevant regulations.

We will help you make your contribution to the reduction of global warming.

COMPLIANCE ALERT!

The Gas Safety Regulations 1998 and The Workplace Regulations of 1992 require that boilers are properly and regularly maintained by a qualified Gas-Safe engineer.

HELP REDUCE GLOBAL WARMING. CALL US TO FIND OUT MORE: 020 3302 6887

A breath of fresh air

Systems that don't provide enough fresh air can make people feel drowsy and lethargic – while encouraging airborne bugs and other pollutants to hang around.

Legally, employers are required to provide each person with at least eight litres of clean, fresh air every second of the working day.

Macair can inspect, service and sanitise all of your office ventilation systems to make them fully compliant and working properly to **protect the health of your people.**

COMPLIANCE ALERT!

The Workplace Regulations 1992 and the Health & Safety at Work Act requires that ventilation systems are cleaned and maintained properly and regularly.
